

## Diesel Fuel Policy

3<sup>rd</sup> March 2022

From the 1st of April 2022 the Government will be removing the entitlement to use rebated fuels (Red Diesel / Red HVO) for most sectors. This is a change that will have an impact on us all.

Due to these new regulations, Baloo Hire will begin transitioning from rebated fuels to white diesel in all our hire equipment.

By the 1st of April 2022, we will be operating our business using white diesel only, any equipment supplied can only be refuelled using white diesel.

Baloo Hire, will supply as standard, white diesel from the 28<sup>th</sup> March 2022 in order to ensure that our company and customers are ready and operating legally by the 1st of April 2022 regulation deadline.

If a machine is refuelled with rebated fuels after the 1st of April 2022, a fee will be charged to drain the fuel tank, dispose of the rebated fuel, and then refill it with white diesel.

To learn more about these changes, click [here](#) to visit a government website that explains the changes and how to prepare for them.

**Currently HVO is not manufacturer approved for all engines in the Baloo hire fleet. To ensure no costly mis-fuelling, machines must not be fuelled with HVO until further notice. We will keep this situation under constant review and will update the guidance according to manufacturer's advice.**
